Preface

Dear reader,

On the following pages you will find our offers for your accommodation during the World Cup in acrobatic Rock 'n' Roll in Slovenia. We did our best to provide you with best offers, given the price, quality and location criteria - and we are proud to tell you that we got some special discounts from the regular prices for you as well! However, if you still choose to look for accommodation yourself, please note that some providers may promise better and more than they can and/or will provide. For any provider, that is not listed below, we can not guarantee you anything.

In order to minimise possible logistical difficulties and to provide best quality services for the teams which will be using our transportation service, we recommend staying in facilities which can be found under "[Accommodations in Vrhnika](#)" section of this offer. For teams which will be using their own transportation service, detailed instructions and emergency contact numbers will of course be provided, therefor accommodation in [Ljubljana](#) is recommended. This is also due to limited number of beds in the town of Vrhnika.

Accommodation [Registration&Cancelation policy](#), as agreed with our providers, can be found at the end of this document.

For more information and bookings do not hesitate to write to matic@plesnomesto.si. Telephone contact possible upon prior notice. Some information can also be acquired using links¹ provided in this document (all links in the digital version of this document are clickable!). However, do NOT book accommodations through their websites. Please note that all descriptions provide only short insight into an offer. For full description and other details please contact us.

We look forward having you here with us!

Best regards,

Matic Moličnik
Coordinator

About your destination - Slovenia

Size: 20,273 km²

Population: 2,000,000

Language: Slovenian

Currency: Euro (€)

Capital city: Ljubljana

Slovenia lies in the heart of Europe, where the Alps meet the Mediterranean and the Pannonia Plain meets the Karst. This small green country measures 20,273 km² in area, and is home to sincere, hospitable people of great diligence. It has an exceptional number of top athletes, and a wealth of cultural creativity. In Slovenia it is not difficult to compare the value of goods and services, as they are priced in one of the world's major currencies, the euro. (www.slovenia.info)

Friday, one day before the competition

On Friday, one day before the competition, we recommend you to visit technical museum Bistra, located near the hall, where competition will take place on Saturday.

Housed in the 6,000 square metre building of Chateau Bistra, formerly a monastery, with a beautiful garden, fish pond and a learning trail through the nearby forest, the Museum features numerous collections from the fields of agriculture, textile engineering, transport, forestry, wood processing, electrical engineering, hunting, fishing and printing. Sundays are reserved for presentations of archaic working techniques, as well as practical demonstrations of tools, gadgets and machinery used in the past in performing everyday tasks (the working of the circular saw, textile and agricultural machinery, water powered mills, etc.). (<http://www.slovenia.info/?muzej=4419>)

English speaking guide will be provided. Upon request (and surcharge) german,

french, croatian, serbian or italian speaking guide is available. Please ask at matic@plesnomesto.si for details.

Sunday, one day after the competition

After the competition ends, we recommend visiting a world famous cave, Postojna cave.

Postojna Cave is a network of 20 kilometres of passages, galleries and chambers into which experienced guides have accompanied more than 31 million visitors in the last 188 years. It is the largest cave in the "classic karst" and the most visited show cave in Europe. In 1872 railway lines were laid in the cave; electricity arrived in 1884. Today you begin your visit aboard the cave train; the electric lighting allows you to admire the size and splendour of the underground world, where the geological past is recorded in a unique manner. Visitors to the cave are dazzled by a wealth of speleothems: calcite formations, stalactites and stalagmites abounding in a variety of shapes, colours and age. The constant temperature in the cave ranges from 8 to 10° C.

Take the train through the underground world of the largest cave in the Classic Karst and the most visited tourist cave in Europe to see magnificent caverns and glistening stalactite formations. (http://www.slovenia.info/?naravne_znamenitosti_jame=450)

If you are interested in visiting, please ask at matic@plesnomesto.si for details.
